

HEALTHCARE & HYGIENE

How optimizing maintenance & performances of in vitro diagnostic machines?

CHALLENGE

In vitro diagnostic machines are critical in the fight against epidemics as well as for routine controls. Their maintenance is therefore critical to ensure the reliability of the analyses.

KEY POINTS

- Having an easy way of applying MRO processes
- Allowing perfect traceability of all used products
- Use perfectly compatible chemicals for the maintenance

ADDEV VALUE

ADDEV Materials sources, provides, and ideally mixes medical greases and lubricants in custom packaging for optimizing maintenance & performances of the diagnostic machines

CUSTOMER BENEFIT

- Full traceability of used products
- Time savings for final user (Optimized packaging)
- Optimal formulation for a long-lasting performance
