

HEALTHCARE & HYGIENE

CHALLENGE

A manufacturer of medical gowns, used during aggressive epidemics, was looking for optimizing its production process and a high-performance sealing material

KEY POINTS

- Sourcing & converting a sealing material, both breathable and water resistant while anti-bacterial
- Respecting medical standards

ADDEV VALUE

ADDEV Materials helped the teams design perfect products by having a ready-to-use material and continuously converting it, thus ensuring security of supply

CUSTOMER BENEFIT

- Seamless outsourcing & high volume converting
- Respect of medical GMP's for the final product
- Ensured safety of the final user
